

Central Shenandoah Valley Bond Data Dashboard

2024 – First Quarter Summary

The bond data dashboard is designed to collect, analyze and share trends in bond release and detention data with the goal to promote safe, equitable and efficient bond decision-making practices.

Blue Ridge Court Services Pretrial Services staff report to the Middle River Regional Jail and the Rockbridge Regional Jail daily to interview all defendants eligible for release. In addition to gathering current demographic, residence and employment information that interview includes administering the Brief Jail Mental Health Screen and a criminal record check through VCIN. The resulting report is in the form of the VPRAI (Virginia Pretrial Risk Assessment Instrument). The cover page of the VCIN records more than a dozen key data points of the release/detain decision making process.

For the purposes of the bond data dashboard the following parameters are followed:

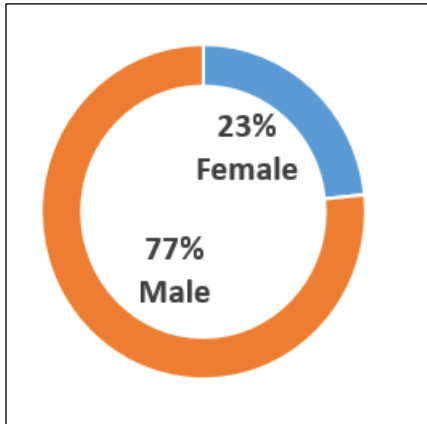

- All defendants from the jurisdictions served by Blue Ridge Court Services who are arrested and detained and who are eligible for release.
- Defendants who have been administered the VPRAI are included.
- Defendants who have refused the VPRAI interview or who were incapacitated are not included.
- If the bond hearing is postponed, it is so noted and the database is updated with the release/detain information at the next hearing.
- Release/detain comparisons are made after sorting out no recommendation and postponed hearing data.
- The VCIN cover pages are collected daily and the data is transferred to an excel spreadsheet designed specifically for analysis.
- Data analysis and trends will be reported quarterly.

Middle River Regional Jail Data

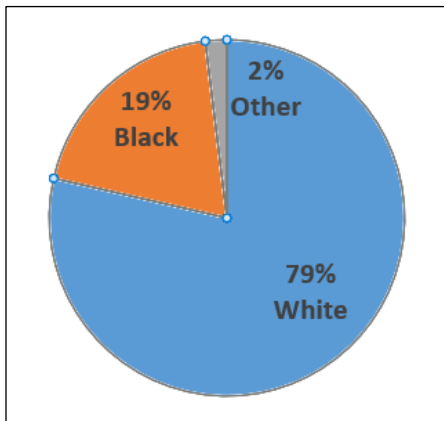

A total of 211 defendants eligible for bond were admitted to the Middle River Regional Jail from January 1, 2024 to March 31, 2024...
