

DEPARTMENT OF FINANCE

PUBLIC NOTICE

SOLE SOURCE PROCUREMENT

December 12, 2024

The City of Staunton decided to award a sole source award to Untethered Labs, Inc. to provide GateKeeper Enterprise, a patented system and method for wireless proximity-based access to computer devices and the City's network.

The City does not currently utilize a system or method for wireless proximity-based access to networking and computer devices. GateKeeper Enterprise will provide multi-factor authentication to the City's network, providing increased network security and fulfilling compliance requirements. The Staunton Information Technology Department has determined that, pursuant to Virginia Code Section 2.2-4303 (E), Untethered Labs, Inc is the only company that meets or exceeds the needs of the City for the wireless proximity-based access to computer devices.

The City of Staunton intends, therefore, to enter into a contract with Untethered Labs, Inc. immediately to provide this system and related services.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "C. Horvat", with a large, stylized flourish extending to the right.

Chad Horvat
Finance Business Manger
