

**BESSIE WELLER ELEMENTARY SCHOOL
SAFE ROUTES TO SCHOOL**
VDOT Project No.: EN16-132-104, C501, P101, R201
FHWA No.: TAP-5132(152)
UPC: 109024

**ADDENDUM NO. 2
October 7, 2019**

This Addendum consists of this cover sheet and the applicable contract document sections noted below. This information shall modify the Contract Documents and Plans and should be attached to the same.

Item 2-1 The City recognizes the lead time needed to order materials (light poles, etc.) and will provide a dual Notice to Proceed for this project. The initial NTP will be issued once the contract has been executed, along with all necessary VDOT forms and approvals. This Notice will authorize the Contractor to only order materials. The City also recognizes the challenges associated with constructing this safe routes to school project during the school year. The City will likely provide the Notice to Proceed with construction on or about June 1, 2020. The allotted 120 working days will begin with this NTP.

The city does not have a storage yard for materials. It will be the contractor's responsibility to store all materials. Upon request the City will consider providing an alternate storage location but will not guarantee that one can be provided.

Bidders are required to acknowledge receipt of the Addendum on their bid submittal.
